Earthquake – 2/6/2023

The deadliest earthquakes in human history

Mapped are the top 10 rankings of known earthquakes by death toll.

Since two events are ranked equally in 8th place, a total of 11 are included. Tectonic plate boundaries are also shown in red.

Death Toll as of this morning :
>50,000 in Turkey
>9,000 in Syria
TOTAL – >59,000

*The death toll figure for the 2010 Haitian earthquake in Port-au-Prince is still disputed. Here we present the adopted figure by the NGDC of the NOAA (for consistency with other earthquakes); this is the figure reported by the Haitian government. Some sources suggest a lower figure of 220,000. In the latter case, this event would fall to 7th place in the above rankings.

Data source: National Geophysical Data Center / World Data Service (NGDC/WDS); Significant Earthquake Database; National Geophysical Data Center, NOAA. This is a visualization from OurWorldInData.org, where you find data and research on how the world is changing.
